Geonwoo Lim

Backend Engineer

Backend engineer with end-to-end experience across planning, design, development, and operations.
Hands-on with real-time communication (WebSocket, WebRTC), CI/CD pipelines, and database schema management. Pick up new technologies quickly and apply them effectively.
I work best in trust-based teams and try to bring positive energy to the room.

SKILLS

LANGUAGE	Java
FRAMEWORK	Spring Boot · Spring Data JPA · Spring Security
DATABASE	PostgreSQL · MySQL · Redis
INFRASTRUCTURE	AWS · Nginx · Docker · Kubernetes · GitHub Actions
TOOLS	GitHub · Notion · IntelliJ

PROJECTS

OMOCHA — Limited-edition Goods Auction

2024.09 - 2024.12 (3 months)

Fastcampus Kernel 360 (team project) · Backend 3 / Frontend 2

An auction platform for hard-to-find limited-edition merchandise.

Java · Spring Boot · Spring Data JPA · PostgreSQL · Redis · AWS · Docker · WebSocket

Real-time chat
- Bi-directional client–server communication via WebSocket + STOMP
- Monitored message flow with RabbitMQ as the message broker

WebP conversion + S3 + CDN
- Converted JPEG / PNG to WebP (image size reduced 70%+)
- AWS S3 + CDN, cutting image download time by 50%+

Flyway-based database migration automation
- Multiple devs editing the same table caused conflicts and per-environment schema drift
- Flyway managed schema changes as scripts with full history

Concurrent bidding race condition
- 100-bidder concurrency test reproduced the issue → adopted Redisson-based distributed lock instead of pessimistic/optimistic DB locks
- @DistributedLock annotation + AOP for a reusable, business-logic-free lock component

Categories / auction post CRUD
- CRUD APIs and category classification across the domain

github.com/Kernel360/F2-omocha-BE (https://github.com/Kernel360/F2-omocha-BE)

Look US — Fashion Community Service

2024.07 - 2024.08 (1 month)

Fastcampus Kernel 360 (team project) · Backend 4

A fashion community where users share daily looks and discover styles by color.

Java · Spring Boot · JPA · MySQL · Redis · GCP · Nginx · Docker · GitHub Actions

Deployment automation with GitHub Actions
- Gradle build → ship JAR to remote server → restart the app
- Hardened the web tier with HTTPS via Nginx + OpenSSL

Image attribute extraction
- Async Vision API calls on upload to identify objects (shirts, pants, shoes) and extract dominant colors (RGB)

Social login
- Spring Security + OAuth 2.0 client library for streamlined sign-up / sign-in

Troubleshooting — accumulating Docker images
- GCP instance crashed from un-pruned Docker images consuming memory
- Added docker image prune -af --filter "until=24h" to the workflow for auto-cleanup

github.com/Kernel360/E2E2-LOOK-US (https://github.com/Kernel360/E2E2-LOOK-US)

ChatHub — Developer Coffee-Chat with Live Video

2024.03 - 2024.06 (3 months)

Kyonggi University (team project) · Backend 2 / Frontend 1

A coffee-chat service where developers meet online over real-time video.

Java · Spring Boot · JPA · MySQL · Naver Cloud Platform · Amazon Chime SDK

Real-time video chat

- Built bi-directional audio/video chat with Amazon Chime SDK
- Designed backend session creation/management via Meeting / Attendee / Voice Connector APIs

Social login

- Streamlined sign-up / login by integrating GitHub OAuth (familiar for devs)
- Used Spring Security with the OAuth 2.0 client library

github.com/24-1Capstone/backend (https://github.com/24-1Capstone/backend)

EDUCATION

Fastcampus — Kernel 360 Backend Bootcamp

2024.07 - 2025.01

Backend Developer Bootcamp (Completed)

Full-cycle experience across planning, build, deployment, and operations

Kyonggi University

2019.03 - 2025.02

B.S. in Computer Science

CES 2024 · Singapore SW Project · Purdue University SW Program

American School of Warsaw

2014.08 - 2017.06

High school diploma
